

AMBIT HAND HELD PRESSURE CALIBRATORS

CARRY CASES

We recommend the use of our aluminium carry case to protect these pressure calibrators and accessories from damage during transit and storage.

The case is cushion lined with high density foam custom contoured to meet your needs.

Made of strong aluminium it is durable, weather resistant and suitable for field conditions.

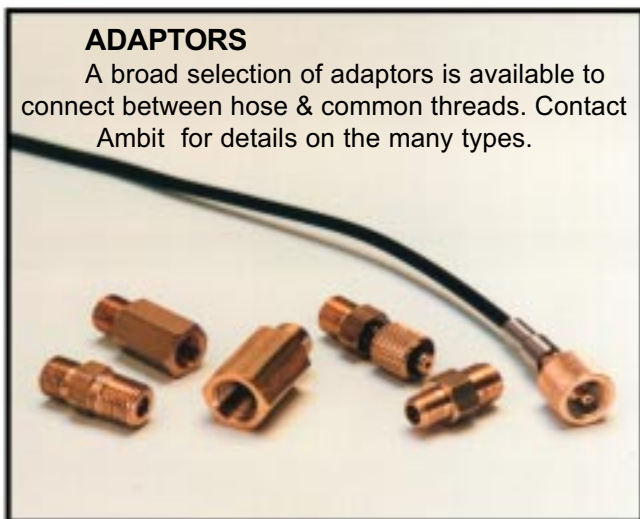

The lockable case comes complete with an adjustable shoulder strap

FITTINGS HOSES & ADAPTORS

ADAPTORS

A broad selection of adaptors is available to connect between hose & common threads. Contact Ambit for details on the many types.

QUICK TEST FITTINGS

For permanent installation in a 1/4"NPT port between instrument and shut off valve. They have a unique finger tight seal and come complete with plug and chain. Materials of construction are brass or stainless steel with buna N seals (95 deg C rating). Optional built-in check valve which opens when hose is attached is also available.

MODELS

QTFT 000B Brass

QTFT 000S Stainless steel

QUICK TEST VALVED FITTINGS

This is a quick test fitting installed in a quality shut off valve. Valve has a 1/4"NPT Male inlet x 1/4"NPT Female outlet.
